EDUCATION

Cornell University, College of Engineering
Bachelor of Science in Mechanical Engineering | Minor in Business

Ithaca, NY
Expected May 2028

Relevant Coursework: Dynamics | Autodesk Fusion | Statics and Mechanics | Thermodynamics | Python | Mechanics | Electromagnetism | Differential Equations | Linear Algebra | Financial Accounting | Finance

GPA: 3.50

TECHNICAL SKILLS

- CAD & 3D Modeling: SolidWorks, Autodesk Fusion, Revit, Ansys
 - **CAD Portfolio:** <https://cornell-mae-ug.github.io/fa25-portfolio-fgc26-dotcom/>
- Code: MATLAB, Python, Java
- Project Management: Bluebeam Revu
- Prototyping & Fabrication: 3D printing, laser cutting, CNC machining (machine job certified)
- Microsoft Office: Excel, Word, PowerPoint

RELEVANT EXPERIENCE

Turner Construction Company

May 2026-August 2026

Mechanical, Electrical, & Plumbing (MEP) Estimating Intern

- Aided in the deciphering of MEP drawings to help create an accurate budget for commercial construction projects
- Utilized Bluebeam Revu and Microsoft Excel to perform quantity takeoffs and prepare detailed scope sheets
- Coordinated with subcontractors to clarify drawing details, obtain pricing, and ensure accurate bid information
- Supported preconstruction planning through site visits to gain insight into project planning, and field engineering

Cornell Project Team: CUSail (Cornell Autonomous Sailboat Competition Team)

January 2025-Present

Mechanical SubTeam: Sails and Rigging Lead

- Managed the design and fabrication of the sail and rigging systems, coordinating timelines and team responsibilities
- Designed a gyroscope in SolidWorks to provide counter torque and maximize the boat's stability in the water
- Manufactured a box and lid for the various electronics to be placed on the boat that was designed on SolidWorks
- Finalized the outer hull mold using fiberglass and epoxy, then sanded and waxed the surface to achieve a smooth finish

ENGRI 1190 (Biomaterials and the Skeletal System) Teaching Assistant

August 2026-Present

- Host weekly office hours reinforcing concepts in material properties and engineering applications to the human body
- Evaluate coursework and develop exams, providing constructive feedback to strengthen students' technical skills

Purdue University Research Lab Intern - Influenza Virus Project

May 2023-August 2023

- Assisted Ph.D. students in developing a color-changing influenza test using a microfluidic paper-based device
- Pipetted various samples and used a spectrophotometer to measure absorbance and wavelength

LEADERSHIP EXPERIENCE

Society of Women Engineers Junior Girl Scouts Outreach Committee Lead:

September 2025-Present

- Supervised a committee in developing a semesterly outreach event for local Girl Scouts to earn STEM badges
- Presented STEM concepts to teach girl scout troops basic engineering skills through interactive activities

Sigma Delta Tau Vice President of Risk Management:

November 2025-Present

- Reduce chapter risk by leading educational presentations on policies, safety, and legal compliance
- Met weekly with the chapter advisor to discuss previous events and work to further develop programs to ensure safety

ADDITIONAL INFORMATION:

Activities: Red Cross Event Chair, Cornell Tradition Scholar, Special Olympics Volunteer, Habit For Humanity Volunteer

Work Experience: Cornell Fitness Monitor (Current), Hostess (2022-2025)

Certifications: OSHA 30 Safety Training

Interests: Sailing, Running, Pickleball
